

**Notice of Availability of Final Scoping Document
Town of Coeymans, Albany County**

The New York State Department of Environmental Conservation (NYS DEC), as lead agency, has accepted a Final Scoping Document for the Draft Environmental Impact Statement which will be prepared for the proposed modernization of the Lafarge Cement Manufacturing Facility. The Final Scoping Document is available for public review at the NYS DEC office listed below, at the website www.bethlehem.com/modernization and also at the local repositories listed below.

The proposed action involves modernizing the existing Lafarge cement facility, replacing the existing wet manufacturing process with a dry manufacturing process. The proposed modernization includes the construction of a new tower of 525 feet, increased carbon monoxide emissions, and potentially increased particulates and VOCs. Other emissions and operations such as water use, effluent discharge, and generation of solid waste will decrease or remain relatively unchanged.

The facility is located in the town of Coeymans, Albany County, east of Route 9W approximately 2.25 miles north of the intersection of Route 143 and Route 9W.

Copies of the **Final Scope** as well as the **Environmental Assessment Form**, the **Positive Declaration**, and the draft **Scoping Outline** and are available for review at the website www.bethlehemchamber.com/modernization or at:
